Brazil Net of Technology
 Technological Innovation on the Brazilian Industry

- The R&D must be understood as the creative core from the scientific and technological activities.
- To the Companies the R&D is not the only way of knowledge creation.
- R&D is an input to the technological innovation process.
- R&D can be developed inside the own Company, it can be done by the acquisition of goods, services and external knowledge.

Brazil Net of Technology

Brazil Net of Technology

Kinds of Innovation – Aspects

- The research involves innovations to the market and to the own Company.
- From all companies that implemented product innovation, only 23.5% declared that the product was new to the market.
- To the innovation of process, this proportion is 11%.
- In short, only 4% from the total of the Companies launched new products in the market, and 3% launched new processes to the market.

Brazil Net of Technology

Brazil Net of Technology
Main Objective of BNT

To promote the federal government institutional articulation so as to propitiate the efficient interaction between public administration, Brazilian university, companies, financial agents, to the technological development of the local productive sectors, attending to the general guidelines:

- I – To stimulate the technology net development;
- II – To approximate the local research center companies to the fomentation agencies aiming the technological development;
- III – To articulate the working groups formation between companies and research centers;
- IV – To develop articulated technological projects that can foster the competitive substitution of goods and services entry on strategic sectors.

Decree nº 4,776 from July, 10th 2003

Brazil Net of Technology

Brazil Net of Technology

Strategic Sectors

Decision-making factors:

Federal Government political guidelines;

Potential of result reproduction on the production chains;

Action focus on the technological development encouragement by the entrepreneurial sector;

The cross-relations between the productive chains must be considered. The petroleum chain, for example, is provided by the chains that furnishes to the automotive, electrical, metallurgical, sanitation sector and others.

Brazil Net of Technology

Priority Sectors

Petroleum, Natural Gas, Mining, Power Energy and Renewable, Agribusiness.

1. Predictable investments volume;
2. Productive chain dynamism;
3. National capital head companies.

Brazil Net of Technology

Main actions from BNT

1. Identification of Entrepreneurial Technological Demands;
2. Mapping of Technological Support Services;
3. Articulation of Projects for the Competitive Substitution of Entries and Value Aggregation for Exports.

Brazil Net of Technology

Brazil Net of Technology

Main Regional Actions

- Project Articulation;
- Commercial Promotion;
- International Cooperation;
- Entrepreneurial Development;
- Integration on the Net;
- Technical Seminars execution.

Brazil Net of Technology

International Cooperation

The international cooperation serves as an instrument to raise the commercial and joint technological development possibilities with countries of interest.

- Head companies, as Petrobrás, on the fields of petroleum and gas, can help on the internationalization process of its local suppliers;
- The right definition of the target countries is fundamental to the success of the actions.

Brazil Net of Technology

Integration on the Net

- Substitution of Imported Inputs;
- Development of New Business;
- System Offer;
- Joint Commercial Actions.

Brazil Net of Technology

Importation Substitution

Historical – 2003

Brazil Net of Technology

Edict CTPetro -2003

- Edict: MST-BNT/FINEP/CTPetro – Value: R\$ 4 million;
- Focus: development of material and equipments which are presently provided only

by foreign suppliers;

- Construction: Petrobrás has defined the specific issues for product development. There were 67 projects received and 13 approved;
- Judgement: projects were evaluated by Petrobrás and FINEP experts, from the different thematic areas involved.

- Mechanic and Metallurgic Ltd

- Special Projects Advisor Ltd.

Brazil Net of Technology

Aerogenerator of 5KW for Distributed Generation

- Opportunity Identification: Defined by the Power Universalization Program from MME
- Project Articulation: answer to edict launched by BNT/MCT on 2003 in partnership with MME and FINEP;
- Financing: resources from the oil sectorial fund on the amount of R\$ 292,500.00.
- Partnership: UNICAMP / TECTROL Electric and Electronic Equipments Ltd. / ELETROVENTO Ltd.

Brazil Net of Technology

Aerogenerator of 5KW for Distributed Generation

Partnership

- UNICAMP
- TECTROL Ltd.
- ELETROVENTO Ltd.

Brazil Net of Technology

Acid-lead batteries to be use on photovoltaic systems

- Opportunity Identification: Defined by the Power Universalization Program from MME
- Project Articulation: answer to edict launched by BNT/MCT on 2003 in partnership with MME and FINEP;
- Financing: resources from the oil sectorial fund on the amount of R\$ 220,159.00.
- Partnership: LACTEC / RONDOPAR Lead and Derivatives Ltd

Brazil Net of Technology

Acid-lead batteries to be use on photovoltaic systems

Brazil Net of Technology

Aeolic Turbine of Vertical Axle

- Opportunity Identification: Defined by the Power Universalization Program from MME
- Project Articulation: answer to edict launched by BNT/MCT on 2003 in partnership with MME and FINEP;
- Financing: resources from the energy sectorial fund on the amount of R\$ 221,860.00.
- Partnership: PUC-RS / INTERCHANGE Electro Mechanic Ltd

Brazil Net of Technology

Aeolic Turbine of Vertical Axle

Partnership

- PUC-RS
- INTERCHANGE Electro Mechanic Ltd.

Brazil Net of Technology

Development of a Radiometer for radiation measurement

- Opportunity Identification: Defined by the Power Universalization Program from MME
- Financing: resources from the energy sectorial fund on the amount of R\$ 220,100.00.
- Partnership: INPE / GAMA RHO Electronic Projects Ltd

Brazil Net of Technology

Development of a Radiometer for radiation measurement

Partnership

- INPE
- GAMA RHO Electronic Projects Ltd

Brazil Net of Technology

Low Noise Inversor for Small Engines Fostered by Photovoltaic Plates

- Opportunity Identification: Defined by the Power Universalization Program from MME
- Financing: resources from the energy sectorial fund on the amount of R\$ 300,000.00.
- Partnership: INPE / ORBITAL Engineering Ltd

Brazil Net of Technology

Low Noise Inversor for Small Engines Fostered by Photovoltaic Plates

Partnership

- INPE
- ORBITAL Engineering Ltd

Brazil Net of Technology

Low Cost Solar Simulator

- Opportunity Identification: Defined by the Power Universalization Program from MME
- Financing: resources from the energy sectorial fund on the amount of R\$ 229,600.00.
- Partnership: INPE / ORBITAL Engineering Ltd

Brazil Net of Technology

Low Cost Solar Simulator

Partnership

- INPE
- ORBITAL Engineering Ltd

Brazil Net of Technology

Pilot Plant of Photovoltaic Modules Production

- Opportunity Identification: Defined by the Power Universalization Program from MME
- Financing: CTEneg: R\$ 2,500,000; Petrobrás: R\$ 564,060; ELETROSUL: R\$ 564,060; CEEE: R\$ 371,880; PUC-RS: R\$ 629,380.79. TOTAL AMOUNT: R\$ 4 million;
- Partnership: PUC-RS / Petrobrás / ELETROSUL / CEEE-RS
